# Medical certificates

A medical examination is necessary to prove a person's state of health and their suitability for working in the respective speciality. We issue the following medical certificates:

- Health certificate for workers handling food and drinking water
- Health certificate for teachers and employees of preschool institutions and employees in direct contact with children and adolescents due to their work obligations
- Health certificate for a welfare worker providing direct service to a person in need
- Health certificate for health care professionals and health care institution professionals in direct contact with patients
- Health certificate for employees providing beauty and personal services who come into direct contact with the client

East Tallinn Central Hospital only issues medical certificates to contractual clients. In the case of private persons, we ask that you contact your family physician for a medical certificate.

If you have any further questions, please write to vilve.ainson [at] itk.ee (vilve[dot]ainson[at]itk[dot]ee) or phone 5400 5849 or 606 7555. We'll get back to you.
