Accessibility user guide

On the East Tallinn Central Hospital website, you can adjust the text size, line spacing and page colours. These options can make the website more comfortable to read.

Opening the accessibility options

Select **“Accessibility”** in the page header. To reach the link using a keyboard, press Tab. The options panel also opens when the link receives keyboard focus.

Changes take effect as soon as you select an option. No separate confirmation is needed.

Changing the text size

Under **“Text size”**, you can select:

- **“Extra large”** – the largest text size;
- **“Large”** – a larger text size;
- **“Vaikimisi”** (default) – restores the standard text size.

Changing the line spacing

Under **“Line height”**, select “Large” or “Extra large” to increase the space between lines. Select**“Vaikimisi”** (default) to restore the standard spacing.

Changing the contrast

Under **“Contrast”**, select **“High contrast”** to change the page colour scheme. Select**“Vaikimisi”** (default) to restore the standard colour scheme.

Removing backgrounds, colours and styling

Under **“Other options”**, there are two settings:

- **“Remove all styles”** – turns off the website’s styles and displays the content in a simplified layout.
- **“Remove backgrounds and colors”** – removes page backgrounds and colour styling.

Clear the corresponding checkbox to turn the setting off.

Restoring the default settings

Select **“Reset options”** to reset all accessibility settings.

Closing the options panel

Press **Esc** or click outside the panel to close it. If the panel has a **“Close”** button, you can also use that.

Remembering your settings

The website remembers your settings in the same browser and on the same device. You will need to select them again in another browser or on another device. Clearing your browser’s site data may remove your saved settings.

Zooming with your browser

You can also use your browser to zoom the whole page:

- On Windows and Linux, press **Ctrl and +** to zoom in, **Ctrl and −** to zoom out, and **Ctrl and 0** to restore the default zoom.
- On a Mac, use the same keys with **Command** instead of Ctrl.

Using the keyboard

Press **Tab** to move between links, buttons and form fields. Press **Shift and Tab** to move backwards.

Press **Enter** to open a link. Press the **Space bar** to select or clear a checkbox. Use the **arrow keys** to move between options within a group, such as the text size options.
