Centre for Allergology and Immunology

The Centre for Allergology and Immunology specialises in the diagnosis and treatment of various disorders of the immune system, including allergic diseases and immunodeficiency. We are the only speciality unit in the field of allergology and immunology in Estonia. Both allergist immunologists and paediatric allergists have appointments in our centre. Our aim is to provide the best evidence-based and comprehensive treatment for patients of all ages. We welcome both children and adults to appointments.

In order to refer an allergist-immunologist to a consultation, the family doctor or specialist doctor will form an e-consultation referral, which we will reply to within 4 working days (the patient will be contacted and the appointment date will be agreed).

In addition, we have a medical geneticist and dermatologists at our centre. A specialist must refer you to a medical geneticist. You do not need a referral to see a dermatologist.

Services

Outpatient appointment with an allergist-immunologist
